To whomsoever it may concern

I am writing this letter to recommend Jimut Bahan Pal for acceptance into your esteemed institution. I have been Jimut's guide and professor for last two years and have seen him grow to an outstanding individual who excels in academic and personal pursuits. I strongly believe that you will find him quite deserving and innovative.

As Jimut's guide, I have witnessed his extraordinary ability to quickly apply concepts to real world situations. His final year project named Wisp was particularly impressive. He build a fully fledged application to find hot-spots of any geographical location according to your preferences under my guidance. It is a data science visualisation project, and he has build everything from scratch. Apart from his academic studies, he volunteered at Exabyte-2017, our Computer Science annual festival. He was the member who designed the Xavotsav website – 2018. He also helped Mathematics department with their fest by designing graphical content, along with coordinating a few NSS social visit. He was a speaker in MLCC (Machine Learning Crash Course) study jams. Finally before leaving the college, he hosted the event Enigma, the coding event for St. Xavier's College Science Association.

During his college life he did several courses on MOOC. He published papers in various reputed International Journals. He is an aspiring and curious researcher and did several personal projects. I am confident he will make an excellent contribution in Computer Science.

I wish him every success in life.
